DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Regarding claim 18, the prior art fails to teach a combination of the steps of:

a link between said adaptive rate interfaces, the link including a working transmission facility for accommodating a traffic pipe of a first bandwidth corresponding to said fast rate during normal operation and a protection transmission facility for accommodating a squeezed traffic pipe of a second bandwidth corresponding to said slow rate during the protection switch; and

protection switching means for detecting an interruption in a flow of traffic through said working transmission facility and for operating the protection switch in response to the interruption so that the flow of traffic traversing said working transmission facility at the fast rate switches to and traverses said protection transmission facility at the slow rate, in the specific combination as recited in the claim.

Regarding claim 25, the prior art fails to teach a combination of the steps of:

transitioning from exchanging traffic at the first rate over the working route to exchanging traffic at a second rate slower than the first rate over a protection route between said data terminal and said network during a protection switching operation; and

transitioning from exchanging traffic at said slower second rate to said normal state of operation during a recovery state of operation, in the specific combination as recited in the claim.

Regarding claim 34, the prior art fails to teach a combination of the steps of:
upon detection of the interruption, switching the unprotected traffic being transmitted over the first route to being transmitted over a second route, wherein the switched traffic is transmitted over the second route at a slower transmission rate than the first transmission rate, in the specific combination as recited in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
